### Filter Housings & Kits

HARVARD

#### **Harvard Series Housing Features:**

- Manufactured from NSF listed, FDA grade 100% polypropylene (polycarbonate for clear).
- · Available in slim and large diameter styles.
- 10" and 20" lengths.
- · Blue and clear sumps.
- 3/4" inlet/outlets on slimline, 1" inlet/outlets on large diameter.
- · All housings have a pressure relief button.
- Patented double EPDM o-ring seals on slimline assures long term seal. Single o-ring seal on large diameter.
- Maximum temperature rating to 125°F and pressure rating to 125 psi.
- Recommended maximum operating pressure 85 psi for slim style and 90 psi for large diameter.
- Filter housings are bulk packed. Cartridges available separately.

WARNING: Prevent Freezing. Never exceed recommended maximum operating pressures. Use proper pressure reducing valves to protect filter housings from excessive pressure surges.

**DO NOT** over tighten fittings used to install filter housing. Over tightening will result in cracking the housing threads and will void all limited warranties. Only PTFE thread seal tape **OR** non-PTFE based thread seal paste approved for plastic threads should be used to seal filter housing threads - **NOT BOTH**.

### **Economy Filter Cartridges**

**EFP Series** 

#### **EFP Series Melt Blown Polypropylene Filter Cartridge Features:**

- Melt blown polypropylene for purity and chemical compatibility.
- Ideal for aggressive chemicals and general sediment filtration when depth filtration is required.
- Max Flow rate 2-8 gpm based on micron.
- Contains no binders, agents, solvents, antistatic materials or wetting agents.
- Meets FDA requirements for food and beverage contact.
- · No leachables or extractables to contaminate.
- No surface binders to reduce flow & increase change-out frequency.
- Rated for tempertures up to 140° F
- Shrink wrapped for purity.

EFP\_G Series

#### EFP-G Series Grooved Melt Blown Polypropylene Filter Cartridge Features:

- Grooved cartridges for increased surface area and greater dirt handling capacity.
- Melt blown polypropylene.
- Maximum tempertures 140° F
- Maximum pressure: 40 psid
- Recommended change out 30 psid.
- Maximum flow rate 2-8 gpm based on micron.
- Shrink wrapped for purity.
- Fits slim and standard style housings.

### **Economy Filter Cartridges**

**EFSP Series** 

#### **EFSP Series Pleated Filter Cartridge Features:**

- Pleated cartridges provide increased surface area, lower pressure drop and longer service life than other cartridges.
- Cellulose-free, 100% synthetic media is washable and reusable, 5 micron and up, to reduce filter costs.
- Contains no binders or additives to breakdown which may cause foaming and filter degradation.
- Color coded end caps 2 3/4" OD.
- Individually wrapped for purity.

### **Big-Bubba Filter Housings**

#### Big-Bubba® High Flow Non-Metallic Filter Housing Features:

Big-Bubba® high flow filters are bigger and better than other non-metallic filter housings because of their economical plastic construction, while pressure rating is nearly equal to stainless steel.

#### Features:

- Made of glass-reinforced polypropylene for greater strength and chemical resistance
- Will not dent, rust, chip or corrode.
- Filters accept a single cartridge for convenience.
- Swing-bolt lid closure is easy, safe and secure.
- · Pressure release for safety.
- Cartridge "lock" adapter to hold cartridge in place.
- Double o-rings on cartridges for superior sealing.
- Two outlets on opposite sides to allow more flexibility with piping configurations.

#### **Typical Applications:**

- Whole house filtration for chlorine, taste, odor and sediment reduction.
- Industrial applications for chemical compatability.
- · Pre-filtration for reverse osmosis.
- · Community water systems for cyst reduction.
- · Sea water filtration for non corrosion.

| Specifications:                   |                     |

| Swing Bolts                       | 304SS               |
| O-Ring (lid)                      | EPDM                |
|                                   |                     |
| Lid closure                       | Swing Bolt          |
| Pipe Fittings (2 inlet, 1 outlet) | 2" slip             |
| Overall height                    | 40"                 |
| Width(vessel OD)                  | 12"                 |
| Maximum Flow Rate                 | 150 gpm *           |
| Maximum temperature (housing)     | 175° F              |
| Maximum working pressure          | 125 psi             |
| Burst test                        | 300 psi             |
| Cycle test (0 to 150 psi)         | 100,000             |

<sup>\*</sup> Dependent on micron rating (see pressure drop chart)

#### **Parallel Installation**

Parallel installations are recommended to achieve high flow rates, by installing filters on a common manifold, feeding all filters installed in a row.

#### **Series Installation**

Series installations are recommended for applications such as surface water filtration, where cartridges having different micron ratings are used.

| Part No. | Description       | Max Flow Rate | Pipe Fitting | List Price |
|----------|-------------------|---------------|--------------|------------|
| BBH150   | Big-Bubba Housing | 150 gpm       | 2" slip      | \$ 2561.80 |

### **Big Bubba Filter Cartridges**

**BBC-P Series** 

**BBC-D Series** 

**BBC-AC Series** 

#### **Big-Bubba® High Flow Filter Cartridge Features:**

Replacement cartridges for Big-Bubba filters, all with double o-ring seals for superior performance.

Cartridges are easy to install, service and replace.

#### Pleated:

• Pleated cartridges are recommended for typical water filtration applications to remove sediment, hard solids and when high efficiency filtration is required. Available in a wide range of micron ratings, including one micron absolute for surface water filtration to reduce Giardia Cycts and Cryptosporidium.

#### Depth:

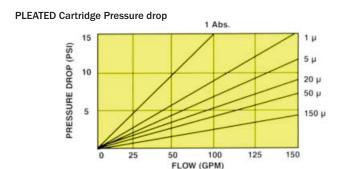

· Select depth cartridges to remove sediment, gelatinous substances and when chemical compatibility is an issue. Big-Bubba melt blown depth cartridges are 100% polypropylene with EPDM o-rings.

#### **Activated Carbon Cartridges:**

· Ideal for whole house filtration and other applications to reduce chlorine, tastes, odors and sediment from water. Rated at 5 micron.

| Specifications:            |           |           |

### **Residential Reverse Osmosis Systems**

HROK4

HROK5

#### **HROK Systems Include:**

- NSF listed John Guest style quick connect fittings.
- Filter housings made from NSF listed materials.
- NSF Standard 58, CE listed polypropylene tank. (10" diam x 15" high)
- 5 micron sediment pre-filter cartridge.
- Activated GAC granular carbon cartridge (5 stage)
- · Activated carbon block cartridge.
- NSF listed Dow/Filmtec thin film membrane. 50 gpd (4 stage) 75 gpd (5 stage).
- · Inline post carbon polishing cartridge.
- · Automatic shutoff valve made with NSF
- Long reach, lead free chrome faucet, meets California AB1953.
- Sump wrench, tubing, service valve, check valve, ball valves, flow restrictor included.
- · Complete installation instructions.
- 5 stage with booster pump for sink water pressure lower than 40 psi.
- Booster pump rated to 125 psi with 110V/60 Hz, 24VDC power.

Note: For cold water use only. Do not install on hot water line. To insure that the membrane is fuctioning properly, the product water must be tested regularly.

#### **HARVARD Residential Reverse Osmosis System Features:**

- Pre-assembled, easy to install 4 or 5 stage RO system.
- · Complete with all installation accessories and instructions.
- High rejection, thin film membrane up to 98% efficient with 50 gal/day (4 stage) or 75 gal/day (5 stage) capacity. (Note: Feed water requirements below)
- NSF Standard 58 listed, CE certified, polypropylene tank rated to 100 psi.
- · All fittings, tubing, housings, valves, cartridges and membranes are NSF listed or made from NSF listed materials.
- Automatic shut-off valve made from NSF listed materials.
- Lead free, long reach chrome faucet included. Meets California AB1953 requirements.
- · Cartridges, valves, fittings, sump wrench, white mounting bracket and complete installation instructions included.

#### Feed Water Requirements:

- Maximum TDS: 2,000 ppm
- Maximum Iron: 0.3 ppm
- Maximum hardness: 12 gpg
- Temperature: 45-100°F
- Maximum hydrogen sulfate:0
- Maximum manganese: 0.05 ppm
- Pressure: 40-85 psi (min/max)
- pH: 4-10

#### The Benefits (nominal ion rejection characteristics)\*

| Aluminum 96-98% I      | Manganese      | 96-98% |
|------------------------|----------------|--------|
| Ammonium 80-90%        | Mercury        | 94-97% |
| Borate 30-50%          | Nickel         | 96-98% |
| Boron 50-70%           | Nitrate        | 90-95% |
| Bromide 90-95% (       | Orthophosphate | 96-98% |
| Cadmium 93-97%         | Phosphate      | 95-98% |
| Calcium 93-98% F       | Polyphosphate  | 96-98% |
| Chloride 92-95%        | Potassium      | 92-96% |
| Chromate 85-95%        | Radioactivity  | 93-97% |
| Copper 96-98% S        | Silica         | 80-90% |
| Cyanide 85-95% S       | Silicate       | 92-95% |
| Fluoride 92-95% S      | Silver         | 93-96% |
| Hardnes Ca & Mg 93-97% | Sodium         | 92-98% |
| Iron 96-98% S          | Sulfate        | 96-98% |
| Lead 95-98%            | Thiosulfate    | 96-98% |
| Magnesium 93-98% 2     | Zinc           | 96-98% |

• The above percent rejection is for reference only. Actual rejection will depend heavily on the exact chemistry, temperture, pressure & TDS content of the feed water.

### **Economy Drinking Water Systems**

DWS2

DWS2M

DWS3M

#### **Economy Drinking Water System Features:**

- · Pre-assembled, easy to install.
- · Complete with all installation accessories and instructions.
- Carbon and sediment filter cartridges sold separately.
- Select the appropriate carbon cartridge to reduce taste and odor, chlorine, giardia, cryptosporidium, VOC's, lead and mercury.

#### **DWS Series Includes:**

- NSF listed housings
- NSF listed John Guest fittings.
- NSF listed tubing.
- Lead free, long reach chrome faucets. Meets State of California requirements.
- WQA validated, 1800 gallon, patented automatic shut-off valve made from NSF listed materials. (DWS-M Series only)
- · White aluminum bracket with stainless steel mounting screws.
- · Saddle valve.
- Carbon filter cartridges NOT included.

| Part No. | Description                       | List Price |

### **Filter Housings**

#### Styles:

- Standard
- Slim Line™
- Valve-in-Head
- High Temperature
- Big Blue®

#### Materials:

- Opaque Reinforced Polypropylene
- Clear FDA Styrene-Acrylonitrile (SAN)

#### Applications:

 Residential/Whole house, Commercial/Industrial, Institutional, OEM

**ISO 9001** 

DO NOT over tighten fittings used to install filter housing. Over tightening will result in cracking the housing threads and will void all limited warranties. Only PTFE thread seal tape OR non-PTFE based thread seal paste approved for plastic threads should be used to seal filter housing threads - NOT BOTH.

PFH75C PFH75B

#### **Standard Housing Features:**

- Ideal for a wide range of residential, commercial and industrial applications.
- 3/4" NPT inlet/outlet.
- Available in 10" and 20" lengths.
- Equipped with pressure relief button on the inlet side of the head.
- NPsuffix no pressure relief button.
- · Available with either clear or opaque sump.
- Maximum operating pressure 125 PSI @ 125° F

| Part No. | Style    | Sump  | Head  | Inlet/Outlet | Length  | Width  | Ctn Qty | List Price |

### **Filter Housings**

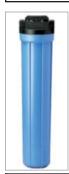

**DO NOT** over tighten fittings used to install filter housing. Over tightening will result in cracking the housing threads and will void all limited warranties. Only PTFE thread seal tape **OR** non-PTFE based thread seal paste approved for plastic threads should be used to seal filter housing threads - **NOT BOTH**.

#### Valve-in-Head Housing Features:

- Valve-in-Head (VIH) feature closed both the inlet and outlet ports simultaneously with a half turn of the handle.
- · Makes cartridge change outs quick and easy.
- Available in 5", 10" and 20" lengths.
- Incudes pressure relief button on the inlet side of the head.
- · Available with either clear or opaque sump.
- Maximum operating pressure 125 PSI @ 125° F

#### PFH75VB20

| Part No.  | Style | Sump  | Head         | Inlet/Outlet | Length  | Width  | Ctn Qty | List Price |

#### **High Temperature Housing Features:**

- Low cost alternative to stainless and carbon steel housings.
- · Durable glass reinforced nylon construction.
- Available with 1/2" and 3/4" NPT inlet/outlet
- · Maximum temperature rating of 160°F.
- Maximum operating pressure 125 PSI.

#### Big Blue® Large Diameter Housing Features:

- Large capacity housing designed for whole house and high-flow applications.
- Available with 3/4", 1" or 1 1/2" NPT inlet/outlet.
- · Available in 10" and 20" lengths.
- Equipped with a pressure relief button on the inlet side of the head.
- Accepts large capacity 4 1/2" diameter cartridges.
- Maximum operating pressure 100PSI @ 100° F
- PFHD10 and PFHD15 packed in white box with a spanner wrench.
- Bulk packed without spanner wrench

- Thermally Bonded polypropylene

PFWP-BB String Wound

PFWPX-BB Fibrillated

#### **String Wound Cartridges**

**ISO 9001** 

#### PFWP & PFCW Series String Wound Polypropylene Cartridges

- Ideal for fine sediment reduction, including sand, silt, scale and rust.
- These cord wound cartridges are compatible with most acids, alkalies, corrosive fluids & gases.
- Precise winding pattern ensures high efficiency rate and high dirt loading capacity.
- · Core material: FDA Polypropylene
- Max temperture: 180° F
- · General purpose filtration.

#### PFWP-BB Series String Wound Polypropylene Cartridges

• Constructed of fiberous polypropylene over polypropylene core. Note: An antistatic agent has been used in the processing of the fiberous polypropylene and may cause some foaming in water.

#### PFWPX-BB String Wound Fibrillated Polypropylene Cartridges

- Constructed of fibrillated polypropylene on a polypropylene core.
- For use when pressures require minimization of exactables and/or fiber migration.

#### PFCP Series Pleated Cellulose Polyester Cartridges

- · 6 sq. feet of media on standard and 16 sq.ft. on BB provide additional surface area and allow increased dirt holding capacity and low pressure drop
- · Ideal for high flow applications.

In Canada:

· Cartridges are encapsulated in polyester outer sheath for added support.

#### PFP Series Spun Polypropylene Fiber Cartridges

- · Excellent bacteria and chemical resistance.
- Manufactured from pure 100% polypropylene.
- Fibers are carefully spun to form a cartridge w/ variable density. The density increases closer to core.
- · Available in three different lengths and micron ratings

#### PFDGD Spun Polypropylene Dual Gradient Cartridge

- · Dual gradient filter included pre and post filtration reduce large and fine particles to enhance cartridge performance.
- Eliminates need for multiple housing step-down systems
- · Three times the dirt holding capacity

#### PFPD Series Thermally Bonded Polypropylene Cartridge

- Manufactured from pure 100% polypropylene.
- 98% efficient, more efficient than resin bonded cartridges.
- Thermal bonded micro-fiber construction.
- Withstands high temperature and pressure differentials.
- No fiber release, brittleness or growth/shrinkage due to climate conditions.
- Available in a wide range of micron ratings and lengths.

#### **Taste/Odor/Sediment Cartridges:**

- Carbon Impregnated
- Granular Activated Carbon (GAC)
- Carbon Block

#### **PFC Series Carbon Impregnated Cellulose Cartridges**

- Dual purpose cartridge provides taste/odor/chlorine reduction plus sediment filtration.
- A combination of carbon and cellulose creates a dual filter used for removing fine particles and reducing unwanted tastes and odors occasionally found in tap water.
- Excellent "polishing" filter when used in process or closed loop systems.
- · Design maximuzed dirt holding capacity.

#### PFGAC PFCC

#### PFGAC Series Granular Activated Carbon (GAC) Cartridges

- Designed to reduce or eliminate unwanted tastes and odors such as chlorine.
- Water enters the filter from the bottom and travels through the entire charcoal bed before exiting at the top. This filtration technique maximizes contact time with carbon to insure maximum absorption.
- Internal expansion pad maintains a tight compact column to minimize channeling or by-pass.
- Nominal 20 micron post filter reduces the content of carbon fines & suspended particles

#### PFCC Series Granular Activated Coconut Carbon Cartridges

- Coconut Shell based activated carbon to reduce organic chemicals like EDB, TCE & THM plus chlorine.
- Nominal 20 micron post filter to reduce carbon fines and other particles.

**PFCBC** 

#### **PFCEP Series Carbon Block Cartridges**

- · Designed for post RO applications.
- Minimizes chlorine and pH rise and produces low extractables.
- · Acid washed coconut formulation
- · Light brown end cap

#### **PFCBC Series Carbon Block Cartridges**

- Designed to reduce VOC's, chlorine, color bodies, plus remove fine sediment from the residual, commercial & industrial liquids. Filters giardia & cryptosporidium cysts from
- High chemical adsorption provided by acid washed bituminous powdered, activated carbon
- Sediment filter eliminates unwanted particles down to 0.5 nominal micron.
- Excellent polishing filter or prefilter.

#### PFCBR Series Carbon Block Multimedia Cartridge

- Removes both metals and chemicals with one cartridge.
- · All purpose carbon block cartridge removes unpleasant tastes and odors plus greatly reduces the amount of dissolved heavy metals and the taste of chlorine.
- Removes lead up to 96% and mercury up to 98%.
- Also removes up to 99% of giardia and cryptosporidium cysts and sediment particles down to .5 micron in size.

### Saddle Tap Valve/Kit and Iron Out®

#### **NO LEAD Brass Saddle Tap Valve & Kit Features:**

- Self piercing tap valve and clamp for 3/8" to 1" OD copper tube or 3/8" to 3/4" iron pipe.
- Plastic sleeve, brass compression nut and brass or no lead brass insert (for reinforcing polyethylene tubing).
- Brass compression union for connecting polyethylene tubing to 1/4" water inlet at refrigerator, humidifier or cooler.
- 25 feet of 1/4" OD polyethylene tubing.
- The saddle tap valve eliminates plumbing connections and
- Supplies water to most humidifiers, evaporative coolers and refrigerators with automatic ice maker or water dispenser in door.
- · Use for installation of Reverse Osmosis and Chemical Contaminant Filter Systems.
- For use on copper tube or iron pipe.

### Harmsco® Filter Systems

#### **Typical Applications:**

- · Drinking water
- · Bottled water
- · Ground Water
- · Asbestos abatement
- · Chill water
- Industrial
- · Process water
- Beverages
- · Surface water
- · Plating baths
- · Desalination prefilters
- Commercial
- R/O pre-filtration
- · Drinking fountains
- · Rinse water
- · Cooling water
- Ultrafiltration
- Municipal
- Industrial waste water
- · Whole house filtration
- Environmental
- Heating loops
- · Spray nozzles

Easy Cartridge Installation and Replacement:

#### Harmsco™ Up Flow Cartridge Filtration . .

A design so superior it's patented!

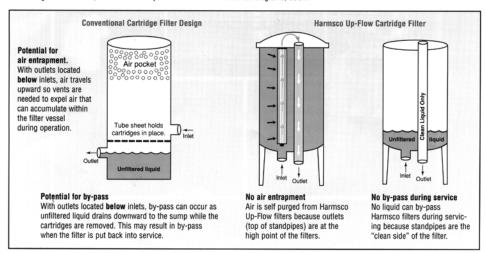

Harmsco® Up-Flow Cartridge filters outperform conventional filter designs because the outlet is located above the inlet to eliminate air entrapment during operation. With Up-Flow Filters, liquid enters the vessel through the inlet, located at the bottom of the filter. As the liquid travels upward, it flows through the media, past the top seal, separating the dirty and clean water chambers, and down the standpipe as it exits the filter. Because the top of the standpipe is located above the top seal, air is self-purged from the filter to eliminate vents and improve filtration efficiency.

#### Features:

- Constructed of low carbon 304 stainless steel for durability and long life.
- · All stainless steel components are electro-polished for superior finish, resistance to corrosion an dincreased durability.
- Individual studs for optium security. No v-clamps with only one bolt to secure
- Wing nuts are used so no tools are required. Finger tight is generally sufficient. Hex nuts are recommended with 75 ft-lbs. or torque above 100 psi.
- All filters are pressure rated to 150 PSI (10bar) and hydrostatically tested.
- Cartridges in some models are arranged in a single "cluster" for easy cartridge installation, removal and service.

#### Harmsco Up-Flow Filters Outperform the Competition!

With conventional cartridge filter designs, inlets are located above outlets. Therefore, vents are required to relieve air that can accumulate within the filter vessel during operation. By-pass can also occur when unfiltered liquid drains to the sump while the cartridges are removed, when the filter is put back in service. Please see diagrams, below:

In Canada:

Hold cartridge by end cap and

Cartridge cluster is ready for

www.americangranby.com

rotate until secure.

### Harmsco® Filter Systems

#### **Two Filter Styles** Cartridge Cluster Filters and High Capacity Models

#### **Cartridge Cluster Filters**

Cartridges in the HIF7, HIF14, HIF16, HIF21 and HIF24 models are arranged in a single "cartridge cluster", ao all cartridges are removed at one time.

**Specifications:** Filter Vessel &

Metal components

Rods & standpipes

Pipe caps

0-Rings

Rim gaskets

**Bottom seals** 

Temperature

Wing Nuts

Pressure

Flow

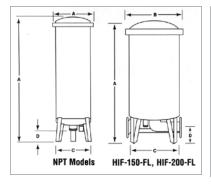

#### **Hi Capacity Filters**

Cartridges in the HIF42, HIF75, HIF100, HIF150-FL, HIF200FL models are installed on lifting rods so a single stack of cartridges are removed at one time for convenience.

#### Low carbon 304 stainless steel, electro polished CPVC, standard models; 304 stainless steel, all stainless models CPVC, standard models; 304 stainless steel, all stainless models EPDM, standard. Buna-N and Viton available Buna-N, standard. EPDM and Viton available Natural gum rubber, standard; EPDM and Buna-N available Brass, Brass nuts and stainless steel flat washers available Rated to 140°F (60°C) with CPVC rods, pipe caps, stanf pipes & standard Harmsco cartridges. To 200°F (93°C) for all stainless models with stainless steel rods, pipe caps, standpipes and Harmsco High-temp cartridges. Temperature limits vary and depend on pressure & time under load. Rated for pressure to 150 psid(10 bar) maximum.

Typical flow rates are 3-6 GPM per single length 9 3/4" Harmsco

cartridges.

#### **Typical Installations:**

#### **Chemical Resistant Coatings:**

Harmsco™ filters are available with a DYKOR coating, a high performance material like PTFE used to provide increaded resistance to chemicals, abrasion & the environment. The coating is applied to all stainless steel surfaces (inside & out).

**High Capacity Models** 

#### Harmsco™ Filters Features:

#### **Cartridge Cluster Models:**

- · Entire set of filter cartridges is removed at one time for cleaning or replacement.
- Filter rack assembly is made of CPVC (stainless steel available)
- Rugged 304 electro-polished stainless steel housing.
- Individual studs for safe, secure lid closure.
- · Brass wing nuts for hand tightening.
- Pressure rated to 150 PSI.
- For whole house, commercial, industrial and municipal applications.

#### **High Capacity Models:**

- · Same features as above with:
- CPVC lifting rods to remove a single stack of cartridges at one time.

Recommended flow rates for guidelines only. Typical flow rates are 3 to 6 GPM per 9 3/4" cartridge. Standard Harmsco Up-Flow filter housings and filter cartridges rated for temperatures to 140°F (60°C) ratings based on pressure and time under load. All stainless filter housings and high temperature cartridges recommended for temperature over 140°F (60°C) to 200°F (93°C).

### Harmsco® Filters

**HUR-AP Series** 

#### Harmsco™ Hurricane Filters It's a Separator & Cartridge Filter in One

Hurricane filters provide unsurpassed performance becaase they separate dense solids prior to cartridge filtration for extended filter life, increased dirt holding capacity and reduced maintenance costs. In many respects Hurricane filters are two filters in one. Components include outer chamber for particle separation, inner chamber for cartridge filtration and built-in drain for purge, if required.

#### Features:

- Outer chamber collects heavy solids at the bottom due to centrifugal force & rotational
- Inner chamber filters liquid through a single cartridge. Liquid enters the filter tangentially to provide rotational flow and centrifugal force for partical separation. Liquid flows out of the filter through the standpipe and outlet fitting.
- Rotational flow pattern continuously "fluffs" filter cake to increase dirt and debris holding capacity to extend filter life and time between cleaning.
- In heavy solid applications, manual or automatic valves may be used to purge solids from the outer chamber. Tests demonstrate approximately half of the heavy solids, like sand, separate prior to the filtration chamber at 50 GPM.
- Constructed of low carbon 3/4 stainless steel for durability and long life.
- All stainless steel components are electro-polished for superior finish, resistance to corrosion & increased durability. (Special chemical resistant coatings available.)
- Fail safe lids with individual studs for optium security. No v-clamps with only one bolt to secure lids.
- · Bronze wing nuts are used so no tools are required. Finger tight is generally sufficient. Hex nuts are recommended with 75 ft-lbs. of torque above 100 psi.
- 90° elbow and 45° sweep on outlet for staggered in-line installation.
- · CPVC standpipe for up-flow design.
- 1/4" couplers are installed in inlet and outlet fittings for pressure gauges.

Unlike convential designs, Hurricane's patented cartridges are made with deep, angles pleats to direct the flow into the pleated area for increased solids removal.

#### Single "Jumbo" Cartridge Filter

Design of a single, jumbo cartridge is easy to install, remove, clean and replace. Hurricane Cartridges are cleanable and re-usable in most applications.

### Harmsco® Filter Cartridges

801 Series

NO LEAD

Pleated polyester design for more surface area, longer life.

Genuine Harmsco® Filter Cartridge Features:

- Six Sq Ft. of filtration, 50% more than the competition per 9 3/4". (12 sq ft for 19 1/2")
- Thermally bonded construction with FDA listed materials.
- Color coded & branded end caps for easy micron identification.
- Cleanable, reusable in most applications.
- Low pressure drop.
- Individually wrapped.

#### Specifications:

Media: Polyester-Plus™ End Caps: Plastisol (pliable PVC) Center tubes: Rigid PVC perforated Surface Area: Approx 6 sq.ft. (9 3/4") Temp limit: Up to 140°F depending

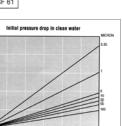

on time & load

#### \* Also available with stainless steel by special order

Install on suction or discharge side of system.

with purge valves on suction side of pump.

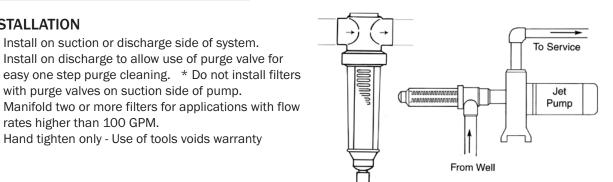

rates higher than 100 GPM.

· Install on discharge to allow use of purge valve for

Hand tighten only - Use of tools voids warranty

#### **Vu-Flow Filter Features:**

- Easy installation on suction or discharge side of pump.
- Filtered material collects on the outside of the screen, making it easy to clean.
- Clear polycarbonate housing permits instant visual inspection.
- Molded PVC filter body allows glue together installation similar to standard PVC pipe fittings.
- Molded from UV stabilized weather resistant materials for long service life.
- Most models have 1/2" MNPT cover drain outlet for quick one step purge cleaning.
- Inlet and outlet slip can be bushed to fit required pipe size.
- · Polyester screens are easily cleaned and re-used eliminating expensive replacement.
- Stainless steel screens are available special order...
- Maximum operating pressure: 150 psi @ 73°F.
- Flow rates from 1-100 gallons per minute.
- Screen mesh sizes smaller than 250 (61 microns) are supported with No. 30 mesh to assure durability.
- WATER USE ONLY

FALL 2016

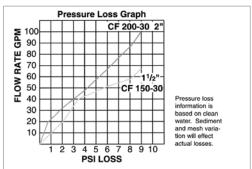

**CF Series** 

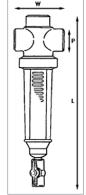

#### **Combination Style Screen Filter Features:**

- Installs as a 90° "L" or 180° in-line "T" installation.
- 10-100 GPM models.
- 1-1/4" plug (supplied) adds versatility to unused outlet.
- Maximum pressure: 150 PSI @ 73°F.
- 1/2" MPT drain cleanout with purge valve.
- Supplied with polyester filter screen.
- Also available with stainless steel screen as special order.

NT SO Series

#### T Style Sand Separator Filter Features:

- 180° in-line "T" style.
- 1-100 GPM models
- "Spin-out" action separates heavier than water particles away from screen into the collection chamber.
- Screen portion of element removes lighter than water particles.
- Extended sump provides greater collection area for sediment.
- Supplied with a 1/2" cleanout with purge valve.
- Supplied with polyester filter screen.
- Also available with stainless steel screen as special order.
- WATER USE ONLY

<sup>•</sup> Do not install filters with purge valves on the suction side of pump

Carton Quantity of 10 for all products

<sup>\*</sup> Minimum flow needed for "spin-out" action.

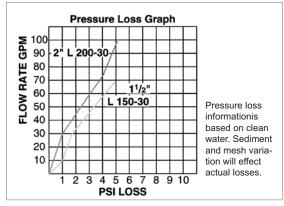

L Series

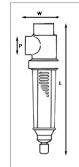

#### L Style Screen Filter Features:

- 90° "L" style installation.
- · Install on suction or discharge side of pump.
- 0-100 GPM models.
- 1/2" MPT drain cleanout is not available on this model.
- Maximum pressure: 150 PSI @ 73°F.
- · Supplied with polyester filter screen.
- · Also available with stainless steel screen as special order.

### **Vu-Flow Screen Filters**

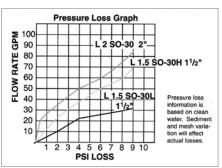

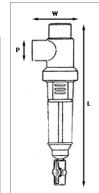

#### L Style Sand Separator Filter Features:

- 90° "L" style installation.
- "Spin out action" separates heavier than water particles away from the screen into the collection chamber.
- 5-90 GPM
- Screen portion of element removes lighter than water elements.
- Available in 5-20, 15-40 and 5-90 GPM models.(A minimum flow rate of 5 GPM is required to operate the filter).
- Extended sump provides greater collection area for sediment.
- 1/2" MPT cleanout with purge valve.
- · Supplied with polyester filter screen.
- Also available with stainless steel screen as special order.
- Available in Low Flow(LF) or High Flow(HF) models.

- $\bullet$  Do not use metal valve or fitting on 1/2" drain connection
- Do not install filters with purge valves on the suction side of pump
- LF suffix denotes low flow, HF suffix demotes high flow.

\* Minimum flow needed for "spin-out" action.

Carton Quantity of 10 for all products

# **Vu-Flow Strainers & Replacement Parts**

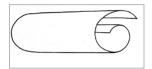

**4BSK Series** 

#### **Basket Strainer Features:**

- Intake screen for lakes or ponds
- High volume capacity, up to 100 GPM.
- Three mesh sizes.
- All PVC construction with easy clean nylon screen.
- Debris accumulates on outside of strainer screen.
- 2" IPS female inlet slip fittings.

### **Automatic Flush Valve**

#### **Automatic Flush Valve Specifications:**

· Adjustable cycle time 5 min - 24 hours · Working Pressure 200 PSIG 25°F to 165°F • Ambient Temperature Enclosure Nema 4

 Voltage 115V, 1 Phase, 60 Hz Current 2.5 Amps Valve Construction **Brass** 

Reinforced PTFE 1/2" NPT-.92 • Discharge Volume

 Power Cord 8' heavy duty grounded

· Full Port Ball Valve 1/2" NPT · Discharge Time 3.5 seconds (Non-adjustable)

**Automatic Flush Valve Kit Includes:** 

(Gal per cycle @ 30 PSIG)

• (2) 1/2" barb x 1/2" NPT male hose fittings

• (2) SAE size 8 SS worm drive clamps

• (24") 1/2" braid reinforced flexible PVC tubing. (Rated at 215 psi)

#### KIT DOES NOT INCLUDE FILTER OR AUTOMATIC FLUSH VALVE.

Please Note: TO insure optimum performance of automatic flush valve, it is recommended that you use the above rated tubing only.

#### Warranty and Disclaimer

A one year warranty applies to the original purchaser. The manufacturer warrants that the AFV will be free from original defects in material and workmanship. Manufacturer will **repair or replace** all parts without charge, found to be defective under normal use and service within the warranty period upon return of product at customer's expense.

## **Ultraviolet Disinfection Systems**

### Ultraviolet disinfection is an effective way to provide bacteria free water for home or industry.

**UVSL Series** 

UV, UVGDS & **UV-W Series** 

- Completely automatic.
- Compact and easy to install.
- No chemicals required.
- Low operating costs.
- Low maintenance.
- No taste or odor.

#### SAFE LITE Economy Series UV Disinfection System Features:

- · Quick installation.
- Economical.
- 304 stainless steel chamber. Electropolished.
- · Sight port to safely view operation.
- 8 gallon complete with flow control.

### **Standard Series UV Disinfection System Features: UV Series:**

- · Constructed for wall mounting.
- 304 stainless steel chamber. Electropolished.
- Sight port to safely view operation.
- 7 & 15 gallon complete with flow control.

#### **UV-W Series:**

- · Same as UV series with:
- Internal wiper unit for manual cleaning of quartz sleeve.
- 8 & 15 gallon complete with flow control.

#### **UV-GDS Series:**

- · Same as UV series with:
- 7 & 15 gallon complete with flow control. Remote flow control adder for 24 gallon (not included)
- Electronic built-in "lamp-out" circuit/alarm.
- ON/OFF indicator light.
- Standard auxillary output terminal for optional solenoid shut-off (UVS077 not included).
- · Built in surge protector and fuse.

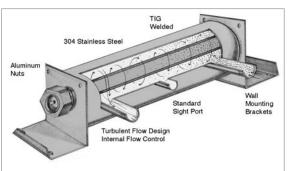

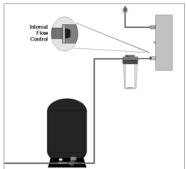

## **Ultraviolet Disinfection Systems**

Water entering the disinfection unit flows in the space between the quartz sleeve and the chamber wall. Turbulent flow through the unit insures exposure of micro-organisms to lethal dosages of ultraviolet rays. Water exiting the chamber is safe and ready to use.

Typical Installation

## **Chemical Feed Pumps - CHEMTECH**

Chem Tech Series 100

#### **CHEM-TECH Series 100 Features:**

- · Positive displacement diaphragm metering
- Feed ranges of 15 and 30 gallons per day.
- Operating pressure up to 100 PSI.
- Life-time lubricated, sealed and self-maintaining gear train.
- Four ball valve design for trouble-free operation.
- Strong chemical resistant, flame retardant housing.
- Metal reinforced, short-stroke diaphragm for extra-long life.
- · Injection back pressure valve assembly enables injection at an angle and inhibits syphoning.
- Fully adjustable output capacity over operating range.
- Bleed valve assembly aids in priming and relieves pressure from discharge.
- UL, CSA approved for outdoor and indoor applications.
- · Manufactured for AGI in an ISO9002 facility.

ISO 9002

Kop Kit®

#### KOP Kit® for Series 100 & Series 200 CHEMTECH Pumps Feature:

1 1/2" long PVC Injection Ftg 1/2" OD tube size

- · Designed to guard against unnecessary down time.
- Kop Kit contains recommended spare parts most likely to require normal maintenance.
- Contains valve cartridges with o-rings, head, diaphragm, secondary o-ring seal, head screen, & washers.
- · Carded and shrink wrapped for display.

Other Series 100 & 200 parts may be ordered. Contact your sales representative.

| Ball Checks    | Ceramic        |
| Fittings       | PVC            |
|                |                |

#### **PULSATRON "C" Series Electronic Metering Pump Features:**

- · Solenoid driven assembly no motors.
- Reliable metering performance.
- Rated "hot" for continuous use.
- High viscosity capable up to 1000 cps.
- Leak free, sealless liquid end.
- Diaphragms are PTFE-faced, bonded to a composite of Hypalon & fabric layers and reinforced with a metal insert.
- Manual control by on-line adjustable stroke length (fixed stroke length.)
- Agency approved for outdoor and indoor use.
- Water resistant for outdoor applications.
- · Highly reliable timing circuit.
- Guided ball check valve system to reduce back flow and enhance oustanding running characteristics.
- Premium stnadard wetted component material.
- · Few moving parts, wall mountable.
- Safe and easy priming with durable leak-free bleed valve assembly.
- Max pressure rating: 80 psi.
- Maximum 30 gallons per day.

#### PULSATRON "C PLUS" Series Electronic Metering Pump Features:

- Same as above plus:
- Manual control by on-line adjustable stroke length and stroke rate.
- · Manufactured for AGI in a ISO 9002 facility.

#### DG/5FV De-gas Five Function Valve Features:

- De-Gas Bypass gasses and fluid during normal pump operation.

  Allows for the constant removal of gases that would otherwise "air bind" the pump.
- Back Pressure Maintains output reproducibility and allows metering into atmospheric discharge.
- Anti-siphon Prevents siphoning through the pump when point of injection is lower than the pump or into the suction line of another pump. Rated at total vacuum.
- Air Bleed Used during priming to manually remove air from the pump head.
- Discharge Drain Depressurize pump discharge line without loosening tubing or fittings. Protects the operator from chemical exposure.

#### Operation:

- The functions are selected by setting two, independent dual position selector knobs.
- The DG/5FV's compatible with most PUL-SATRON and CHEMTECH series pumps.
   Connected to the existing discharge valve the DG/5FV is capable of handling a large output flow as well as viscous liquids. A return port located on the side body provides flow of chemical back to the solution tank when in the degas, air bleed or drain discharge mode.
- Degas/bypass volume is adjustable, typically 1-10% of pump output.

| Specifications: |               |

### Chemical Feed Pumps - Uni-Dose™

U1 and U0 Series

- Available with single or dual output control for easy accurate adjustment over operating range.
- Turn down ratio up to 100:1.
- Maximum output from 6 to 30 gallons per day at 80 psi.
- · Virtually silent, ideal for household applications.
- Totally enclosed, chemical resistant housings provide superior protection in either indoor or outdoor applications.
- Reliable solid state eletronics are fully encapsulated to ensure long life.
- Solenoid design provides power without fans, open housings, motors or
- Safe inherent pressure relief stops pump if system back pressure exceeds the pump strength.
- Thermostatic protection prevents damage from overheating.
- Four self-cleaning Uni-valves designed to maintain prime while eliminating scaling and clogging associated with ball valves.
- · Each pump comes complete with an injection check/back pressure valve, a foot valve and strainer, PVC suction tubing, UV resistant PE discharge tubing and tubing straightener.
- Heads and fittings constructed of high strength PVC.
- 1.4 AMPS maximum current @ 120 VAC.
- · Made in USA.
