The Fyrite® INSIGHT® Plus is Bacharach's premium residential and light commercial combustion analyzer. This American-made analyzer uses advanced technology to accurately measure, analyze and report results that validate safe operation, efficiently tune older systems and save customers' money.

Featuring industry-exclusive B-Smart® CO sensor technology, it enables technicians and HVAC/R service representatives to install pre-calibrated sensors right in the field to avoid costly downtime and inconvenience.

Five Tools in ONE with Real-Time Analysis

The Fyrite® INSIGHT® Plus is a five-in-one steady state combustion analyzer that is capable of measuring flue gas and room air CO, and can also function as a dual channel digital thermometer (up to 999° F) and a digital manometer (which measures draft, gas pressure, ESP, and up to +/- 40 INWC).

Able to provide up to 100 combustion, pressure and temperature records, the Fyrite® INSIGHT® Plus can also display measurement results instantly for up to ten different fuels on its full-color backlit LCD display. In addition, specific information can also be downloaded to a PC or printed via an infrared printer.
