

Pump Alternator

DVSA Pump Alternator Control and Alarm System

Switch Options:

DVSA-VS

DVSA-DF

Pump Alternator Features:

- Prolongs pump life by alternating two primary pumps
- **NEW:** Runs both pumps at the same time if extra capacity is needed
- If one pump fails the other pump will take over and an audible alarm will sound
- Flashing light will indicate which pump is failing
- Remote terminal allows the unit to connect to the Pro Series WiFi Module, security system, auto dialer or other dry contact based device
- **NEW:** Includes your choice of either:
 - Two low-voltage vertical float switches (model # DVSA-VS)
 - Two caged dual float switches (model # DVSA-DF)
- If one float switch fails the other float switch will take over and an audible alarm will sound
- **NEW:** Detachable float switch wires for easy installation
- Angled receptacles to accept a standard or right-angled pump plugs
- **NEW:** Built in circuit breakers for both pumps (15 total amps max.)
- High Water Alarm with accompanying LED indicator, audible alarm, and 9V battery backup
- Plug and play for easy installation
- 9 foot long power cord
