**ROOF FLASHING AND ACCESSORIES**

In 1916 L.R. Oatey founded his plumbing supply company in Cleveland, Ohio. Originally he sold one product, a lead roof flashing for venting plumbing pipes. The first flashings were all made from sheet lead. Our flashings progressed onto cast lead, followed by copper, galvanized and aluminum bases with poured lead collars.

L.R. insisted that everything about that product, everything that represented the Oatey brand, was about quality in meeting our customers' needs. We have not strayed from that same commitment even though 100 years later, we have expanded operationally to become a global manufacturer of thousands of products.

Today, Oatey offers over 6,000 residential and commercial plumbing products through its six branded lines. After a century of incredible progress, Oatey has changed with the times, meeting the needs of its customers and manufacturing products designed to deliver quality, build trust and improve lives. Because of this evolution, Oatey is recognized today as a leading manufacturer of high quality plumbing products.

# Installation of Oatey Standard or Universal Master Flash®

**1 SELECT and TRIM…**
Choose appropriate Master Flash with opening at least 20% smaller than pipe diameter. If necessary trim opening to 20% smaller than pipe diameter.

**2 SLIDE…**
Slide Master Flash down over pipe (A non-petroleum base lubricant will ease installation).

**3 FORM…**
Press Master Flash down, bending it to conform to roof profile or roof irregularities. A blunt tool will help press flashing into tight roof angles.

**4 SEAL…**
Apply sealant between base and roof.
**5 FASTEN**
Use fasteners to complete sealing. For UPC installation, fastener spooning may not exceed 1-1/2" (38 mm).
