General

- Packaged rooftop units cooling, heating capacities, and efficiencies are AHRI Certified within scope of AHRI Standard 210-240 for 6 to 25 Tons and ANSIZ21.47 and 10 CFR Part 431 pertaining to Commercial Warm Air Furnaces (all gas heating units).
- -Convertible airflow.
- -Symbio controls operating range is from 0-125.0 F from factory; if designing for cooling mode operation below 40.0 F ambient temp, add low ambient kit to assure continuous and reliable operation.
- -Factory assembled, internally wired, fully charged with R-410A, and 100 percent run tested to check cooling operation, fan and blower rotation, and control sequence before leaving the factory.
- -Colored and numbered wiring internal to the unit for simplified identification.
- -Units cULus listed and labeled, classified in accordance for Central Cooling Air Conditioners.

Casing

- -Zinc coated, heavy gauge, galvanized steel.
- -Weather resistant pre-painted metal with galvanized substrate.
- -Meets ASTM B117, 672 hour salt spray test.
- -Removable single side maintenance access panels.
- -Lifting handles in maintenance access panels (can be removed and reinstalled by removing fasteners while providing a water and air tight seal).
- -Exposed vertical panels and top covers in the indoor air section insulated with a cleanable foil-faced, fire-retardant permanent, odorless glass fiber material.
- -Base pan shall have no penetrations within the perimeter of the curb other than the raised 1 inch high downflow supply/return openings to provide an added water integrity precaution, if the condensate drain backs up.
- -Base of the unit insulated with 1/8 inch, foil-faced, closed-cell insulation.
- -Unit base provisions for forklift and/or crane lifting on three sides of unit.

Hail Guards

-Provides condenser coil protection.

Microchannel Coils

- -Optimal heat transfer performance due to flat, streamlined tubes with small ports, and metallurgical tube-to-fin bond.
- -Reduce system refrigerant charge by up to 50% leading to better compressor reliability.
- -Compact all-aluminum microchannel coils reduce the unit weight.
- -Recyclable all aluminum coils All aluminium construction minimizes galvanic corrosion.
- -Strong aluminum brazed structure provides better fin protection.
- -Flat streamlined tubes more dust resistant and easy to clean.
- -Coils leak tested at the factory to ensure the pressure integrity.

Compressors

- -All units have direct-drive, hermetic, scroll type compressors with centrifugal type oil pumps.
- -Suction gas-cooled motor with voltage utilization range of plus or minus 10 percent of unit nameplate voltage.
- -Internal overloads standard with scroll compressors.
- -All units have dual compressors.
- -Three stages of cooling available on 6 to 17.5 tons units and four stages of cooling available on 20 and 25 tons units.

Filters

Two inch standard filters shall be factory supplied on all units.

Frostat

- -Utilized as a safety device.
- -Opens to prevent freezing temperatures on evaporator coil.
- -Temperature will need to rise to 50°F before closing.
- -Utilized in low airflow or high outside air applications (cooling only).

Gas Heating Section

- -The heating section shall have a progressive tubular heat exchanger with corrosion-resistant aluminized steel tubes and burners as standard on all models.
- -Stainless steel heat exchanger with 409 stainless steel tubes and 439 stainless steel burners shall be optional.
- -Induced draft combustion blower shall be used to pull the combustion products through the firing tubes.
- -Heater shall use a direct spark ignition (DSI) system.
- -On initial call for heat, the combustion blower shall purge the heat exchanger for 20 seconds before ignition.
- -After three unsuccessful ignition attempts, entire heating system shall be locked out until manually reset at the thermostat/zone sensor.
- -Units shall be suitable for use with natural gas or propane (field-installed kit).

Heat Exchanger

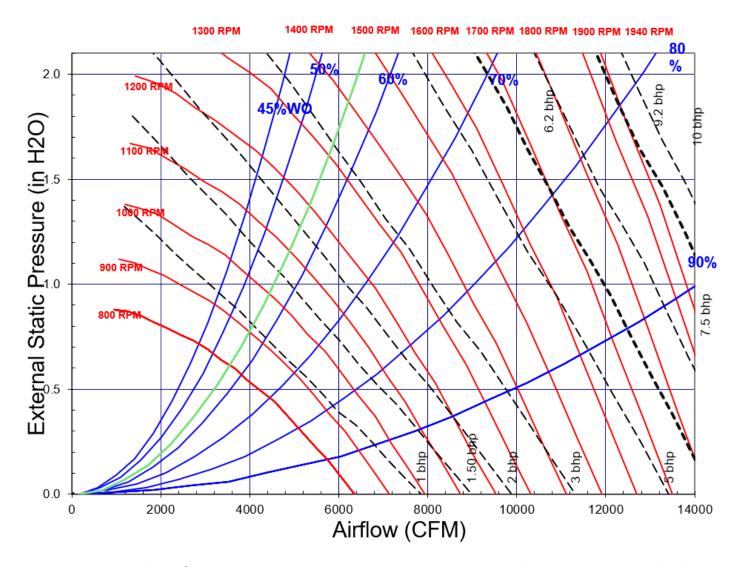

- -Compact cabinet features a tubular heat exchanger in low, medium and high heat capacities.
- -Corrosion-resistant aluminized steel tubes and burners are standard on all models.
- -Induced draft blower to pull the gas mixture through the burner tubes.
- -Direct spark ignition and a flame sensor as a safety device to validate the flame.

Indoor Fan

- Direct drive plenum fan design 6 to 25 tons units.
- Plenum fan design backward-curved fan wheel along with an external rotor direct drive variable speed indoor motor.
- Supply fan speed adjustments can be made using the Symbio 700 or Mobile App.
- Motors are thermally protected.
- Variable speed direct drive motors are high efficiency 6 to 25 tons.
