EvoPEX[®]

A PEX Push-to-Connect System

Reliance Worldwide Corporation®

Reliance Worldwide Corporation® (RWC) is a market leader and manufacturer of water control systems and plumbing solutions for residential, commercial and industrial applications. Established in 1949, the RWC portfolio includes industry-leading brands: SharkBite® Push-to-Connect plumbing solutions; HoldRite® engineered plumbing and mechanical solutions; Cash Acme® control valves; John Guest® fittings and fluid dispense products and StreamLabs® smart water technologies. Engineered for quality and efficiency, the portfolio of products from the RWC brands work together to create an end-to-end solution from meter to fixture, floor to ceiling.

Deliver

Our innovations are designed to improve job site performance and efficiency with a full range of plumbing solutions for installing an entire potable water plumbing system from meter to fixture, floor to ceiling using a single source manufacturer.

Control

We offer an extensive range of reliable solutions for providing precise control of water safety, efficiency and performance, including pressure, thermostatic and temperature control valves designed to safeguard water systems in all types of facilities.

Optimize

Our smart water technology enables the tracking of water consumption and provides real-time alerts on possible leaks, as well as giving visibility to water usage and habits, helping identify ways to conserve.

Solve

We provide intelligent pipe and connection solutions to move liquid and air for specialist industries across the world. Our technologies serve industries such as plumbing, drink dispense, pneumatics, compressed air and water purification.

One family of brands, one complete solution.

Deliver

Push-to-connect system

A complete push-to-connect plumbing system for hot and cold water and central heating applications.

Engineered solutions

Secondary pipe supports, acoustic noise and vibration plumbing solutions, sleeving, firestop systems, DWV testing solutions, and water heater accessories

Control

Water control valves

World leading temperature and pressure control valves for the precise, reliable and safe delivery of water to residential, commercial and industrial properties.

Optimize

Smart home water monitor

Smart home water monitor and leak detection technology to protect homes from water damage.

Solve

Specialist industry solutions

Push-to-connect technology for the movement of fluid, air and data.

Proudly made in the USA, the SharkBite EvoPEX system is an evolutionary step in providing an advanced potable water system for safe and efficient water delivery. We own our manufacturing process from start to finish, so every EvoPEX fitting and every foot of SharkBite PEX pipe is guaranteed from concept to delivery.

SharkBite EvoPEX Fittings

SharkBite EvoPEX is an innovative push-to-connect fitting designed for new construction and re-pipe applications. Engineered as a more efficient alternative to tool-based pipe joining methods, SharkBite EvoPEX improves efficiency, minimizes lost time on the job and mitigates risk.

SharkBite PEX Pipe

SharkBite PEX pipe is a cost-effective piping solution approved for use in both hot and cold plumbing installations. We meet the highest chlorine resistance standards and UV resistance standards. With more than 850 million feet of PEX pipe installed in North America, SharkBite PEX pipe is proven and guaranteed.

When installed as a comprehensive plumbing system with other trusted products from SharkBite, Cash Acme and HoldRite, the SharkBite EvoPEX system is truly the one and only total rough-in plumbing solution.

Quality in every component

Standard Body

Body

Acudel® modified PPSU provides toughness and chemical resistance along with excellent anti-decay and dimensional stability.

Body Components

O-Ring

EPDM provides resistance to extreme heat, ozone, UV, alkali, and mild acidic and oxygenated solvents as well as high resistance to chloramine at high temperatures. The EvoPEX O-ring seals on the inside of the pipe for a water-tight connection.

Grab Ring

Stainless Steel 316 with highest corrosion resistance and strength. The grab ring has teeth that “bite” on the pipe exterior.

Indicator Ring

Provides visual assurance of proper insertion depth and connection.

Spacer

Strong polymer with dimensional stability and chemical resistance for additional support while guiding the pipe into the fitting.

Collet

20% glass fiber reinforced Grilamid provides high impact strength, chemical resistance, and high dimensional stability.

Collet Retainer

Stainless Steel 304 provides excellent corrosion resistance and holds the collet together on the body for a professional appearance.

Certifications

ASSE 1061

NSF/ANSI/CAN 61

CSA B137.5

NSF/ANSI 14

ASTM F877

ASTM E84*

ASTM E119

Refer to QAI Laboratory Listing #P343-1

New Construction Residential

Plumb an entire home without the need for any special tools. No crimp, clamp, or expansion tools, and no soldering or glue are required.

Cash Acme Valves
Point-of-use and point-of-source temperature actuated mixing valve that delivers water at a controlled temperature.

EvoPEX Fittings
EvoPEX fittings are designed for connecting PEX pipe and eliminate the need for special tools, optimizing install efficiency.

SharkBite PEX Pipe
A cross-linked polyethylene (PEX) tubing that does not corrode, pit or scale, and provides the highest chlorine and UV resistance.

Quarter Turn Supply Stops
Full range of stops to control water flow to fixtures. Push-to-connect ends eliminate the need for bulky tools when installing in tight spaces. Solutions available for PEX, Copper, CPVC and PERT installations.

HoldRite Pipe Supports & Brackets
Versatile brackets ideal for sink, lavatory, shower and toilet plumbing solutions.

Washing Machine/Ice Maker Outlet Boxes
Outlet boxes with SharkBite push-to-connect fittings allow for quick and easy installation of appliances. Available with or without water hammer arrestor.

Water Heater Accessories
Wide offering of solutions for installing water heaters, as well as bracing and support systems.

Frost-Free Sillcocks
Protects the valve from freezing conditions, and from potential back pressure and contaminated water flowing back into the main line. Push-to-connect inlet enables quick installation.

Cash Acme Tank Booster Pro
Easy to install water heater mixing valve that mixes hot water with cold to deliver tempered water at 120°F (49°C). Increases usable hot water capacity by up to 100%.

Ball Valves
Convenient single lever control makes it easy to use and shut-off the water supply. Can be rotated after assembly for easier installation in tight spaces.

Cash Acme Pressure Regulating Valves
EB45 and EB25 PRVs with a wide range of connections, including SharkBite push-to-connect.

New Construction Commercial

By understanding the needs of plumbing and mechanical contractors, RWC offers a wide variety of innovative solutions for industry needs.

SharkBite PEX Pipe

A cross-linked polyethylene (PEX) tubing that does not corrode, pit or scale, and provides highest chlorine and UV resistance.

HoldRite No-Hub Fitting Restraints

Ideal solution for restraining no-hub cast iron soil pipes against separation during high thrust conditions.

HoldRite HydroFlame Firestop Systems

UL Listed for water, smoke, gas, fire, and thermal. Firestop systems provide a water seal for unwanted water intrusion while protecting against the spread of fire, smoke and gases.

Water Heater Accessories

Wide offering of solutions for installing water heaters, as well as bracing and support systems.

EvoPEX Fittings

EvoPEX fittings are designed for connecting PEX pipe and eliminate the need for special tools, optimizing install efficiency.

Outlet Boxes

Outlet boxes with SharkBite push-to-connect fittings allow for quick and easy installation of appliances. Available with or without water hammer arrestor.

Cash Acme HG135 Thermostatic Mixing Valve

The sleek, compact design easily fits under or behind a single basin and is intended for use with faucets and electronic sensor faucets.

HoldRite Pipe Supports & Brackets

Versatile brackets ideal for sink, lavatory and toilet plumbing solutions. Quality and efficient install to replace time consuming makeshift methods.

SharkBite Large Diameter Fittings

Versatility to connect copper, CVPC, PEX, HDPE and PE-RT pipe without needing special tools, optimizing install efficiency. Available in 1-1/4" to 2".

HoldRite TestRite Drain, Waste & Vent (DWV) Testing

Provides safe, dry, and fast DWV testing.

Plumbing a Better Jobsite

SharkBite EvoPEX push-to-connect fittings and SharkBite PEX pipe delivers the ability to plumb an entire potable water system from meter to fixture without the need for special tools. This revolutionary system provides a faster, safer, and more reliable installation for long-term performance and satisfaction.

Efficiency

No special tools, soldering, glue or crimping, optimizing install time and efficiency. Fittings can be rotated after installation for quick alignment and faster installation.

Peace of Mind

A green visual indicator on the fittings provides assurance that a secure connection has been made, reducing the risk of install errors and potential leaks, providing a minimal learning curve.

Health & Safety

No soldering, glues, or solvents required for installation, which keeps potentially dangerous chemicals out of your potable water supply and eliminates potential risk of fire from use of torches on the job site.

Quality

Push-to-connect technology does not add any external stress to the fitting connection or alter the shape/integrity of the pipe as other tool-based PEX fittings, which provides assurance of long-term quality performance.

Proven & Guaranteed

SharkBite PEX pipe has been around for more than 35 years with over 850 million feet in North America. Over 1.5 million connections are made a week with SharkBite fittings and is thus the most trusted brand for push-to-connect technology.

Made in the USA

EvoPEX fittings and SharkBite PEX pipe are manufactured domestically in Cullman, AL. RWC is the largest PEX manufacturer utilizing the silane method.

Efficient Water Delivery

The SharkBite EvoPEX system is resistant to corrosion and mineral build-up to maintain full flow of water and efficient hot water delivery.

Reliability

25-year system warranty* including 10 year consequential damage coverage to provide years of protection and satisfaction.

Durability

SharkBite PEX pipe is tested to the highest level of chlorine resistance standards and is certified to meet ASTM F876 requirements for continuous hot water recirculation. SharkBite PEX pipe also has the highest UV resistance at 6 months to meet the 5306 ASTM standards.

*For full warranty details, please visit sharkbite.com

EvoPEX System Comparison

SharkBite® EvoPEX®

Plumbing solutions for a wide range of applications.

SharkBite EvoPEX is an evolutionary push fit plumbing system that enables an entire potable water system to be plumbed without needing special tools, glue, crimping or solder. It is designed to help installers optimize install times and improve productivity, while minimizing the risk of leaks from installation errors.

K22223	1" x 1"	6

Supply Stops with Escutcheon

Part no	Size	Type	Min. Order Qty
K23036	1/2" x 3/8" Comp	Angle	12
K23037	1/2" x 3/8" Comp	Straight	12

Chamfer Tool

Part no	Description	Min. Order Qty
25829	1/2" x 3/4" x 1" Chamfer Tool	1

Customizing with SharkBite EvoPEX Street Tees

The maximum number of street tees that can be joined together is based on sizing requirements of the code. The maximum WSFU that can be fed off of the trunk line is limited to the requirements in the code based on available pressure, total developed length, residual pressure requirements and water supply fixture unit load.

Reducing Street Tees

Part no	Size	Pack Qty	Min. Order Qty
K4483WP3	3/4" x 3/4" x 1/2"	3	1
K4485WP2	1" x 1" x 1/2"	2	1

Installation Requirements

Pressure Testing EvoPEX Systems:

Consult your local codes for system testing requirements. Testing must be completed prior to concealing fittings with concrete or by other means. Use only dishwashing liquid soap and water to detect plumbing leaks. Avoid using 'Leak Detector' spray products.

Water Testing:

The test pressure applied to the system must meet the pressure testing requirements of local code, but cannot be lower than the system operating pressure. The pressure with water cannot exceed the following pipe listings:

73.4°F (23°C) at 160psi

180°F (82.2°C) at 100psi

200°F (93.3°C) at 80psi

It is recommended to test at a pressure of 80psi.

Air Testing:

When air is used for pressure testing, consult local codes to ensure proper testing methods are followed.

Making an EvoPEX Connection

Step 1

Cut the desired length of pipe.

- Square cut, perpendicular to length of tubing
- Cut SharkBite PEX Pipe using a quality PEX cutter with a sharp blade.

Step 2

Examine the EvoPEX fitting and SharkBite PEX tubing

- Ensure that both are free of debris and damage in preparation for making a connection.

Step 3

Push the pipe into the fitting firmly.

- A twisting action reduces insertion force.
- Take care to avoid inserting pipe at an angle.

Step 4

Verify that the pipe is pushed into the fitting fully and engaged properly.

- Check that the green indicator ring is fully visible.

EvoPEX Facts

EvoPEX push-to-connect fittings can only be used with PEX pipe. EvoPEX fittings have been designed to be used with SharkBite PEX pipe. We control the OD, and more importantly the ID, of our PEX pipe to more rigorous tolerances than the ASTM standards. This enables us to optimize o-ring sealing and provide a long fitting life.

EvoPEX fittings cannot be installed on copper or CPVC pipe due to the inner pipe seal. The fittings will fit on alternate pipe materials but the o-ring seal will not occur due to ID pipe dimensions. Using EvoPEX fittings on any pipe other than PEX will void all warranty.

EvoPEX fittings can be rotated after assembly and will not affect the integrity of the connection.

EvoPEX fittings and SharkBite PEX pipe are certified for potable water installations, Propylene Glycol mix up to 100% and non-potable applications such as hydronic and potable heating.

In freezing temperatures, SharkBite PEX water systems are less susceptible to burst due to the pipe's ability to expand.

The outside temperature does not affect installation of EvoPEX fittings and can be tested immediately once all connections are made.

SharkBite PEX pipe for potable water applications is certified by NSF International to meet the latest ASTM F876 oxidative-resistance requirements for continuous recirculation, as indicated by the PEX 5306 designation on white, red, and blue tubing. SharkBite PEX pipe meets the highest chlorine resistance rating that indicates suitability for use in continuous recirculation systems where tubing is exposed to hot (up to 140°F), chlorinated water 100 percent of the time.

EvoPEX fittings are approved for underground burial. EvoPEX fittings are certified for underground

applications without a wrapping material and have a 10-year warranty when buried. Brass EvoPEX fittings (adapters) must have an impervious barrier between the fittings and the surrounding soil. Self-fusing, formaldehyde and chloride-free, fully-cured silicone tape with a minimum thickness of 0.020" should be used.

All SharkBite Universal brass fittings must have an impervious barrier between the fitting and the surrounding soil. Self-fusing, formaldehyde and chloride-free, fully-cured silicone tape with a minimum thickness of 0.020" should be used.

EvoPEX fittings have a 30 day UV rating, while SharkBite PEX pipe has a 6 month UV rating.

EvoPEX fittings have no space requirement between fittings. Minimum cut length of pipe between fittings should be long enough to fully engage the indicator ring to ensure you have full insertion depth of the pipe into the fitting. This will be visible by the green indicator ring present in the collet windows.

EvoPEX fittings are suitable for attic applications with temperatures pressures of 80 PSI @ 200°F (93°C), 100 PSI @ 180°F (82°C), and 160 PSI @ 73.4°F (23°C) when installed as per the installation instructions and relevant plumbing codes.

SharkBite® PEX Pipe

Flexible, freeze resistant pipe for residential and commercial installations.

SharkBite PEX pipe is a cross-linked polyethylene pipe approved for use in potable water installations. It provides the flexibility to bend around corners, reducing the number of fittings needed. SharkBite PEX pipe meets the highest chlorine resistance standards and has a six month UV rating.

Support of SharkBite PEX Pipe

SharkBite PEX Pipe must be properly supported as per local code. For both horizontal applications we recommend the pipe be supported every 32" between supports (sizes 1" and smaller), leaving a little slack in the pipe to allow for normal expansion and contraction. Always use approved PEX supports and never use a support that has sharp edges. It is recommended to support PEX tubing in vertical installations, refer to local codes for distances between supports.

Horizontal Support

	IPC	UPC	NPCC
1/2" - 1"	32"	32"	32"
1-1/4" - 2"	48"	48"	32"

Vertical Support

	IPC	UPC	NPCC
1/4" - 2"	Base and at base of alternate floors (< 7.5 m)		
Mid-story Guide	X	X	

Installation of SharkBite PEX Pipe Embedded in Concrete

SharkBite PEX Pipe can be embedded in concrete but we recommend the following guidelines to ensure a long lasting installation.

Protect the SharkBite PEX Pipe with non-metallic sleeves when entering or exiting the concrete slab. A larger diameter piece of SharkBite PEX Pipe also works well in this application.

Avoid making connections in concrete. Use a continuous length of SharkBite PEX Pipe within the slab and be sure to check for leaks before pouring concrete.

Cross Linking Methods

Cross linking is a process that changes the chemical structure of high density polyethylene used to make PEX Pipe, so that the polymer chains are connected with each other in a three-dimensional matrix by chemical bonds. PEX A, B and C are terms used to describe the different manufacturing methods used to produce PEX Pipe, not grades of PEX. Regardless of which manufacturing method is used, all PEX Pipe meets the same ASTM standards for commercial and residential plumbing applications.

Technical Data for SharkBite PEX Pipe

SharkBite PEX Pipe Marking:

All SharkBite PEX Pipe is marked with:

Tubing Length

Manufacturer	Optional for Oxygen Barrier Pipe Only	Tubing Size & Identification	Chlorine Resistance	Manufacturing Location & Date
0025 ft SharkBite	02 Barrier	1/2" SDR9 PEX5306 160PSI@73F - 100PSI@180F		C1 WG 6.12.14=16:00

Code Evaluation

CSA B137.5 ANSI/AWWA C904 ASTM F876/877 (ASTM F1807, ASTM F2098, ASSE 1061)

Technical Data For SharkBite PEX Pipe (Cont'd)

Certifications

The SharkBite PEX Pipe is design certified to ASTM F-876, F-877, UL 1821, CSA B137.5 standards, and is listed to NSF/ANSI 61 and NSF/ANSI 372 standards and CSA B137.5 standards for use in potable water systems.

Maximum Working Pressure

160psi @ 73.4°F (23°C)
 100psi @ 180°F (80°C)
 80psi @ 200°F (93°C)

Thermal Expansion

Since SharkBite PEX Pipe will expand and contract during temperature changes, please allow slack when running the pipe through the building. SharkBite PEX Pipe will expand and contract at a rate of approximately 1.1" per 100 feet of Pipe for each 10°F change in temperature (see equation below). We recommend that offsets and expansion loops be used as ways to compensate for expansion and contraction.

PEX tubing will expand/contract at a rate of 1.1" / 10°FΔT / 100'

Expansion/Contraction Loop Methods

SharkBite PEX Pipe Dimensions, Bend Radius and Fluid Capacity

Nominal Diameter	OD Inches	ID Inches	Bend Radius	Fluid Cap 100'/Gals

SharkBite® Valves & Accessories

Superior quality valves that establish trust.

A total system from meter to fixture, the SharkBite product offering goes beyond the traditional pipe-and-fitting solutions to include valves, outlet boxes, water heater connectors, supply stops and other accessories needed to install a complete potable water plumbing system.

Making a SharkBite Universal Connection

Step 1

Cut the desired length of pipe.

- Square cut, perpendicular to length of tubing

Step 2

Deburr the end of the pipe to remove any sharp edges.

- Inspect tubing for damage
- Examine fitting to assure that it's free of debris

Step 3

Mark the pipe using the depth gauge tool

- Use the depth gauge opening that corresponds to the tubing outside diameter

Step 4

Push the tubing into the fitting.

- Mark from the depth gauge should rest against edge of release collar

Disconnecting a Fitting

Remove fitting with disconnect clips.

- Place the disconnect clip against the end of the fitting.
- Push the disconnect clip, compressing the release collar.
- Pull tubing away from fitting (slight twist).

Disconnect tongs can also be used.

- These are generally used in areas where there is no room for the disconnect clip

Limited Warranty

SharkBite®, Cash Acme®, HoldRite®, John Guest® Products

What does this warranty cover?

Subject to conditions outlined in this statement, RWC (in the USA, Reliance Worldwide Corporation and in Canada, Reliance Worldwide Corporation (Canada) Inc.) warrants to owners of real property in the United States and Canada that SharkBite and Cash Acme products, when used and installed in accordance with the requirements set forth, shall be free from defects in material and workmanship for the applicable Warranty Period. This Limited Warranty is in effect for installations made after January 1, 2018 and is applicable to products installed in the country in which they were purchased.

Proof of purchase is required to validate the Warranty Period. If proof of purchase is not available, the Warranty Period commencement shall default to the date of manufacture for each product. If the product suspected of a defect does not have a clear date of manufacture on it, a proof of purchase will be required.

What are the conditions of this warranty?

- All products must be installed in accordance with all then applicable codes, good plumbing practice, in accordance with any local, state, provincial or federal requirements, and installed in a potable water or radiant heating application unless a non-potable water service is specifically allowed for in the pertinent product literature.
- The installer must use construction techniques compliant with then applicable codes to install the product and use the product within the design parameters specified in any installation guidelines and technical notes for the applicable system. This shall include field pressure testing prior to concealing with concrete or by other means and wrapping any brass fitting when buried. Failure to install RWC products according to manufacturer's installation instruction will void all applicable warranties and may result in severe water damage.
- Products must at all times be used in a manner consistent with their intended use and be used in installations and environments acceptable to their material and design specifications, including not being installed in a system that may operate at temperatures or at pressures that exceed the approved ratings which can be found on the product, packaging or installation instructions.
- Additional product specific conditions of this Limited Warranty and the Warranty Period are documented in the section entitled "HOW LONG DOES THE LIMITED WARRANTY COVERAGE LAST AND WHAT OTHER SPECIFIC CONDITIONS EXIST FOR EACH PRODUCT?".
- Without limiting the foregoing, this Limited Warranty does not apply and you do not have a right of reimbursement if the product failure or resulting damage is caused by: (a) evidence of tampering, mishandling, neglect, abuse, accidental damage, freeze damage (it is expressly understood that failure as a result of any freezing fluids within the pipes does not constitute a defect in material or workmanship and shall not be covered by this warranty) or unauthorized modifications or repairs that cause damage to warranted products; (b) exposure to harmful, unauthorized, or unanticipated chemicals or substances or corrosive water conditions; (c) exposure to ultraviolet light; (d) faulty installation including failure to follow proper burial instructions; (e) damage from abnormal operating conditions including exposure pressures and temperatures beyond the specified operating range; (f) failure to properly test and pass common testing methods (including pressure testing) after the installation and before the product or system is put in service; (g) components not manufactured or sold by RWC; or (h) acts of nature such as earthquakes, fire, flood or lightning.
- Although RWC provides a plumbing system to facilitate a complete installation, other manufacturers pipe and/or fittings may be installed in any given installation provided manufacturing of the pipe and/or fittings demonstrates compliance with the applicable ASTM/CSA standards, and the product has been certified by a recognized third-party testing agency. The RWC product in the given installation will continue to be covered under this Limited Warranty although limits on Warranty Period may apply. RWC will be responsible only for proven defects in material or workmanship in RWC products. Problems in products manufactured by another company should be reported to that manufacturer.

How do you get service?

In order to be eligible for service under this Limited Warranty you must return the defective product to RWC for inspection and testing within thirty (30) days after detection of alleged failure or defect occurring within applicable Warranty Period (with shipping charges prepaid) to the original place of purchase. If the alleged defect involves a connection or joint with a RWC product, the fitting must be returned with a section

of the pipe still inserted. You must include the model number of the product (if available), the original date of purchase, proof of purchase and the nature of the alleged product failure or defect. Products returned without shipping charges prepaid will be refused. For questions or inquiries, in the U.S. call 1(877)700-4242 and in Canada 1(888)820-0120.

What will RWC do?

If, after inspection, we find that a product covered by this Limited Warranty has failed due to a defect in material or workmanship during the specified Warranty Period, we will repair or replace, at our sole option, free of charge, the defective product during normal working hours and through a place of business as determined by RWC.

Notwithstanding anything to the contrary in this Limited Warranty, if RWC determines that any damages to the real property in which a defective product was installed were the direct result of a leak or failure caused by a defect in material or workmanship in any RWC product covered by this Limited Warranty and occurring within the first ten years after date of purchase or during the applicable Warranty Period, whichever is shorter, and if reasonable steps were taken to promptly limit or stop the effects of such leak or failure as soon as it was discovered, then RWC will reimburse the property owner for the reasonable costs of repairing or replacing such damaged real property to include flooring, drywall and painting and other real property damaged by the leak directly caused by the allegedly defective RWC product when the RWC SharkBite Connection System product was installed by a licensed professional plumbing contractor. Except as specified above or otherwise specifically authorized in writing by RWC, RWC shall not pay for any costs or expenses for transportation, relocation, labor, repairs or any other work associated with removing and/or returning failed or defective products or installing replacement products.

This shall constitute the sole and exclusive remedy for any defective product.

What does this limited warranty not cover?

RWC shall not be responsible for any other incidental, indirect, contingent, special or consequential damages, including without limitation, economic loss, lost profits or the cost of repairing or replacing other property which is damaged if these warranted products do not work properly, other costs resulting from labor charges, delays, vandalism, negligence, fouling caused by foreign material, damage from adverse water conditions, adverse chemical environments, or

any other circumstances over which RWC has no control. This limitation applies even if RWC could have foreseen or has been advised of the possibility of these damages. This Limited Warranty shall be invalidated by any abuse, misuse, misapplication or improper installation of the product. Any remaining warranty coverage may not be assigned or transferred after the period ending ten years following the installation. RWC does not guarantee or in any way warrant the integrity or workmanship of the contractor/installer.

Miscellaneous

Some States/Provinces do not allow limitations on how long an implied warranty lasts, and some States/Provinces do not allow the exclusion or limitation of incidental or consequential damages. Therefore, the above limitations may not apply to you. This Limited Warranty gives you specific legal rights, and you may have other rights that vary from State/Province to State/Province. You should consult applicable State/Provincial laws to determine your rights.

SO FAR AS IS CONSISTENT WITH APPLICABLE STATE/PROVINCIAL/FEDERAL LAW, THE EXPRESS WARRANTY SET FORTH HEREIN IS THE ONLY WARRANTY GIVEN BY RWC WITH RESPECT TO THE SHARKBITE® AND CASH ACME® PRODUCTS AND RWC MAKES NO OTHER WARRANTIES, EXPRESSED OR IMPLIED, AND HEREBY SPECIFICALLY DISCLAIMS ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

This Limited Warranty and any claims arising from breach of contract, breach of warranty, tort, or any other claim arising from sale or use of RWC's products shall be governed and construed under the laws of the State of Georgia. No action on the part of RWC under this Limited Warranty shall be construed as an admission of liability of that the product is not fit for its intended use.

How long does the limited warranty coverage last and what other specific conditions exist for each product?

Training

RWC Product Trainers are committed to creating a blended learning environment that features interactive online, classroom and field instructions for the plumbing and water management industry. Our curriculum offers courses and higher education learning opportunities for plumbing industry professionals.

Online Training - Learn as you go with accessible education that's virtual and self-paced.

On-site Training - Customizable on-site training that covers general plumbing theory and hands-on instruction.

SharkBite, Cash Acme & HoldRite Want To Reward You

Contractor Rewards is our way of saying thanks for being a loyal customer. It's a loyalty program that rewards contractors like yourself by allowing you to earn rewards points from your SharkBite and Cash Acme purchases, as well as from purchase with other leading manufacturers. Simply enroll online at ContractorRewards.com and submit your invoices when you purchase SharkBite or Cash Acme products. Once enrolled, you will be able to check your point's balance, view eligible products and use your points to shop for rewards.

Return Goods Policy

No material shall be returned without expressed written approval from RWC. All returns must be accompanied by a RGA number as assigned by RWC. Any returned item not identifiable by this number is subject to rejection of applied credit. Where credit is issued, it will be at original invoice price or current price if lower, less all applicable handling charges and restocking fees. Returns must be submitted within 30 days of original invoice unless otherwise agreed upon in writing. All returned material must be in original packaging and sellable condition.
